

THE TOWN CRIER

Goings-on from the town of Frosthaven

Local Heroes Wolf Pack

Zoey's Minions had a surprising encounter while walking a wolf pup they had found last week. The pup led them to a nearby field where two adult wolves were waiting. After a tense standoff, the pup affectionately leapt into Craig Heart's arms and the adult wolves led the heroes to a nearby cave.

Upon investigating, the group of mercenaries found the cave crawling with stone and moss, and worm-like creatures with bladed appendages. The heroes successfully cleared the cave of the unwanted residents and were greeted by the wolves' victorious howls.

The heroes finally bid a teary-eyed farewell to the wolf pup with before returning to Frosthaven.

Bug in a Jar

While walking in the woods, Zoey's Minions heard a tiny voice calling for help and discovered a large beetle rubbing its limbs together producing a sound that was almost like human speech. The beetle claimed to be part of a Harrower and begged to be saved. The heroes chose to take the bug with them. Questions around it's origins remain unanswered

Town Readies For Great Dallas

Great Dallum, a powerful seer, will be visiting Frosthaven in two week. The announcement has prompted excitement and preparations across the city. A hunting party, assisted by the mercenaries, gathered wild meats and vegetables outside Frosthaven in preparation for the feast. The citizens are considering making lavish donations as an offering to grant their wishes. Stories about the Great Dallum's personality and abilities are spreading across the town.

Captain Philip Doghogger, an experienced sailor, offered his services and has been hired to captain the ship. He helped name the ship, SS Hoarder, before it was launched into the chilly waters. After half a day of inspecting the rigging and securing a crew, the ship is now ready to brave the icy sea and leave the town of Frosthaven behind.

SS Hoarder Is Here!

The shipyard has been buzzing with activity for the last few days as a Harrower carpenter and other workers have been working hard constructing a single-mast ship. The Harrower Carpenter was hired by Zoey's Minions to build a boat to access areas north across the water.
